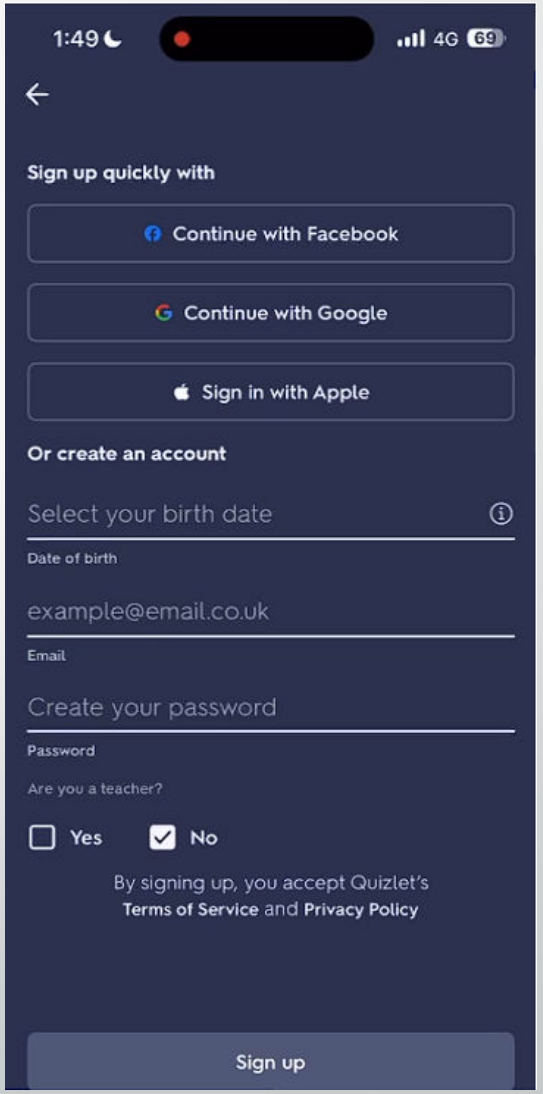
How to create a Quizlet Account

Step 1: Go to the Quizlet app and click 'Sign up'.

Step 2: Log in with Google, Facebook, Apple or create your own account. **Please use your full name** for the username for verification purposes.



Use your full name (no space, all small letters) + MS at the end as your username so that we can verify your identity. Other usernames will be removed from the group.

e.g. if your name is Albert Lim, your username will be albertlimMS.

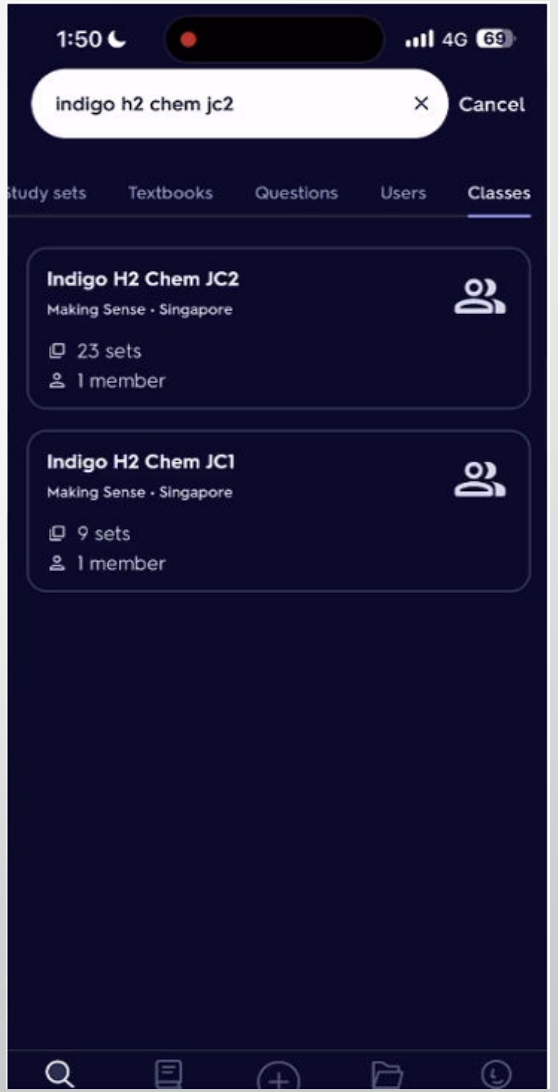
If your full name is too long, do check with your tutors and let them know.

How to join a Quizlet class

Step 1: After creating an account, go to the search function below and filter the results to only show classes.

Step 2: Search 'Indigo Chem Upper Sec (2024)', 'Indigo H2 Chem JC1' or 'Indigo H2 Chem JC2'.

You will arrive at this page, click on the respective level you are in.



Step 3: Click on your respective class and click

'Join' at the top right hand corner.

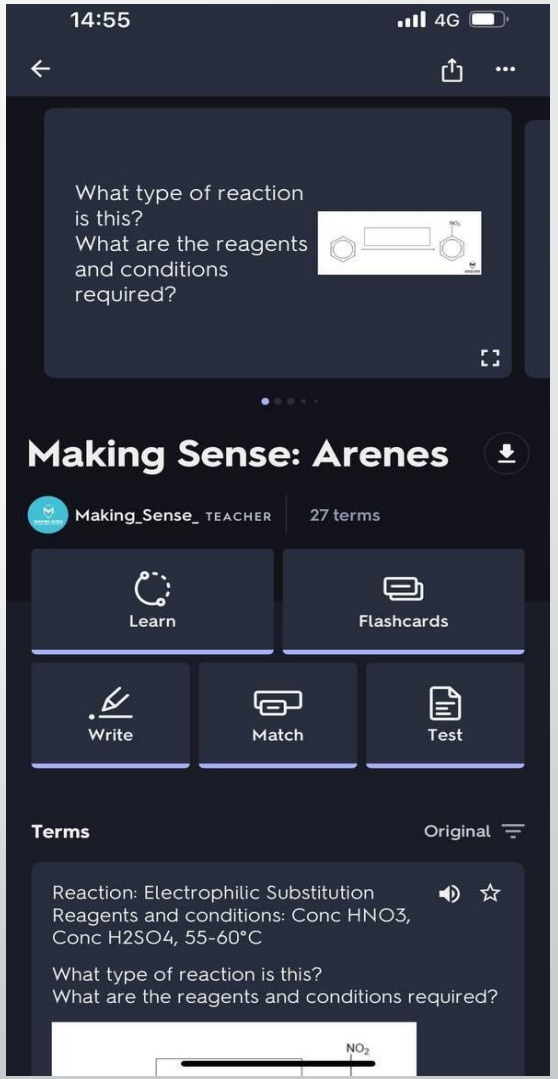
Our admin will approve as soon as possible.

How to use Quizlet

Step 1: Under 'Your library', study sets for each topic will be available once approved. Clicking on a chapter such as 'Arenes' will bring you to this page.

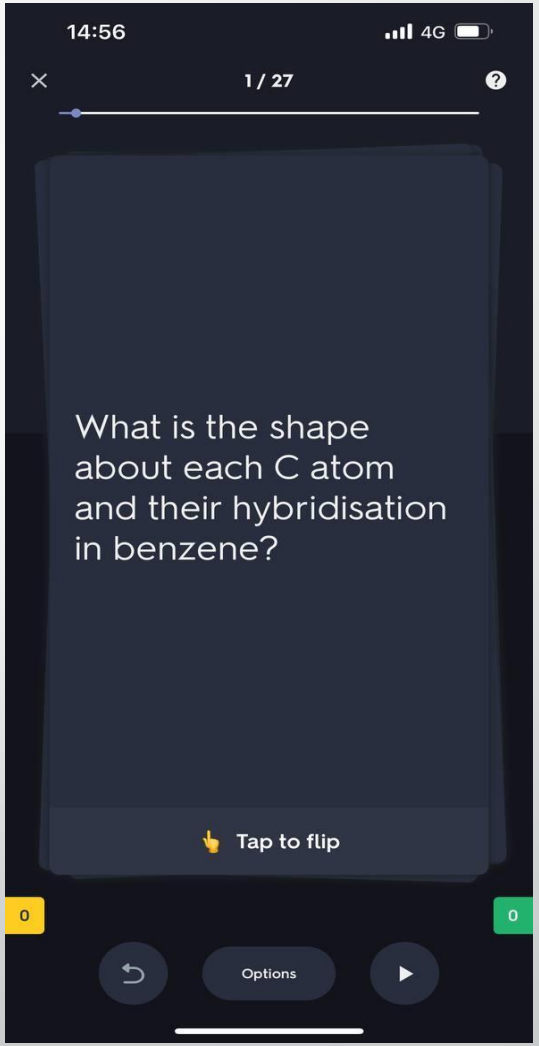
Step 2: Try out different modes of studying on the left column that best cater to your needs!

We recommend using 'Flashcards' at the start to build a stronger foundation before using the other modes.



How to use Flashcards

Step 1: Click on 'Flashcards' from the previous page. You should see a page like this:



Step 2: Test yourself! Read the question and have an answer in your mind. Click on the card itself to check your answer!

- If the answer appears on the top instead of the question, click on the 'Options' icon at the bottom and switch the card orientation.
- If you wish to scramble the order of the cards, you can use the 'shuffle' function.
