General Paper

Essay Bridging Workshop

Suitable for JC students who...

- Are in JC 2 but never did Indigo's JC 1 programme
- Write essays without a method and want to stop guessing

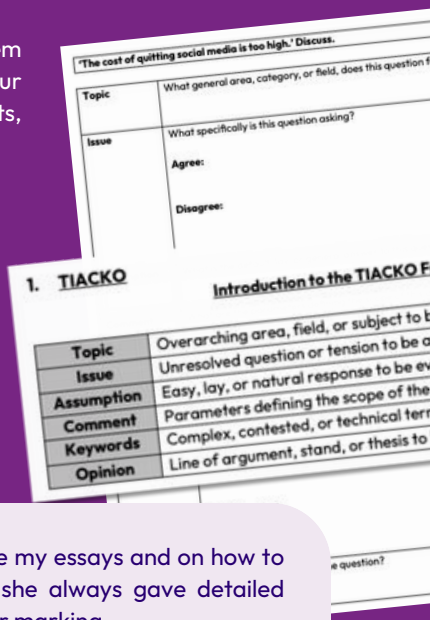
This workshop is not for you if...

- Already completed Indigo's full JC 1 GP programme (same frameworks)
- Want topic/content revision (this is a skills workshop, not a content workshop)

You know what you want to say. You just don't have a system for saying it.

Most JC students can write decent English. The problem isn't language—it's method. They stare at eight questions, pick the one that looks easiest, start writing, and hope the structure holds up. When it doesn't, the essay comes back marked "off-topic" or "lacks coherence."

This 2-day workshop teaches the essay-writing system behind Indigo's GP programme—the frameworks our students use to decode questions, structure arguments, and write essays that examiners actually reward.



What's included

- 81-page workshop booklet — theory, worked examples on real A-Level questions, in-class exercises with full answer keys
- In-class practice — you don't just learn the frameworks, you apply them on actual exam questions during the session

Hear what your seniors have to say!

My tutor actively gave me pointers on how to improve my essays and on how to improve my reading comprehension skills. Further, she always gave detailed feedback for any extra work that I submitted to her for marking.

Ethan, RI
Indigo 2025 GP student

INDIGO

GENERAL PAPER | JUNIOR COLLEGE 2

Walk away with:

- TIACKO—a 6-step method for breaking down any essay question before you write a word. Topic, Issue, Assumption, Comment, Keywords, Opinion. Five minutes of decoding saves you from 90 minutes of writing the wrong essay.
- SSS Introductions—Salience, Stakeholders, Stance. Not a "hook" followed by a vague thesis. A logical setup where each element makes the next one make sense.
- Body paragraphs that actually prove something—the PEEEL structure (Point, Explanation, Example, Evaluation, Link), two types of explanation, and how to pick examples that don't just illustrate but demonstrate.
- The techniques that turn a B into an A—qualifiers that refine your argument, rebuttals that break your opponent's logic, and three types of synthesis paragraph most JC students have never been taught.

Schedule

2 Jun (Tue), 3 Jun (Wed)
10am - 2.30pm
Balmoral Plaza, #B1-09

Fees

	From 1 May 2026	Early Bird Special (30 April 2026)	Indigo Access+ (Immediate*)
Fees	$616	$550	$500

- All fees are subject to GST
- Holiday Programme Vouchers are applicable
- For non-Indigo students, a one-off $75 registration fee is applicable
- Discounts cannot be combined unless otherwise stated
- *Access+ rate applies to students who sign up for regular Indigo classes immediately
- Terms and conditions apply

General Paper

Comprehension Bridging Workshop

Suitable for JC students who...

- Joined Indigo after the JC 1 Comprehension module had already been covered.
- Are in JC 2 but never actually learned a method for SAQs.
- Can sort of answer compre questions, but couldn't explain to someone else how you got there.

This workshop is not for you if...

- You've already completed the JC 1 Comprehension module with Indigo
- You're looking for a Paper 1 (Essay) workshop
- You want passage practice without learning a method

You can read the passage. You understand the words. But when it comes to the questions, something breaks down. Some days you score well because you happened to get the passage. Other days you don't, and there's nothing to fall back on.

The problem isn't your English. It's that nobody taught you a system.

This workshop gives you one. Over two days, you'll learn a classification framework that sorts every Paper 2 question into a type, each with its own diagnosis and answering structure. No more re-reading a question three times hoping you'll figure out what it wants.

What's included

- 90-page workshop booklet covering all four Paper 2 components (SAQ, NIT, Summary, AQ)
- Theory notes with diagnosis criteria and answering prescriptions for each question type
- Worked samples with "From the Passage → Inferred/Paraphrased" answer tables
- Guided practice (with scaffolding) and unguided practice (exam conditions) for each section
- Full answer keys with model responses
- Crash course on Singapore's societal structures and systems for answering AQ
- In-class exercises with immediate feedback

Hear what your seniors have to say!

The comprehension materials were useful with many questions for specific types of question types which allowed me to practice each specific question type.

Rayyan, VJC
Indigo 2025 GP student

INDIGO

GENERAL PAPER | JUNIOR COLLEGE 2

Walk away with:

- A typing system that sorts every SAQ into one of six categories. Each type has its own diagnosis and answering structure. Inference (Authorial Technique), Inference (Language Use), Paraphrase, Hybrid, Comparison, and Cross-Passage Comparison—you'll know which one you're looking at and exactly how to answer it.
- A framework for the new cross-passage comparison question that Cambridge introduced in the 2024 syllabus. The NITS method (kNow, Identify, Tell, Show) breaks down what "identify and justify" actually requires.
- Concrete methods for Summary and AQ. Summary: how to use Focus and Signal to pick points, and three paraphrasing techniques (synonyms, antonyms, concise language). AQ: the 6-step paragraph structure with Singapore contextualisation.

Schedule

8 Jun (Mon). 9 Jun (Tue)
10am - 2.30pm
Balmoral Plaza, #B1-09

Fees

	From 1 May 2026	Early Bird Special (30 April 2026)	Indigo Access+ (Immediate*)
Fees	$616	$550	$500

- All fees are subject to GST
- Holiday Programme Vouchers are applicable
- For non-Indigo students, a one-off $75 registration fee is applicable
- Discounts cannot be combined unless otherwise stated
- *Access+ rate applies to students who sign up for regular Indigo classes immediately
- Terms and conditions apply

General Paper

Essay Polarities Programme

Suitable for JC 2 students who...

- Write full-length essays that somehow still don't answer the question
- Read the question multiple times and still unsure what it's actually asking
- Get told "you didn't address the question"

This workshop is not for you if...

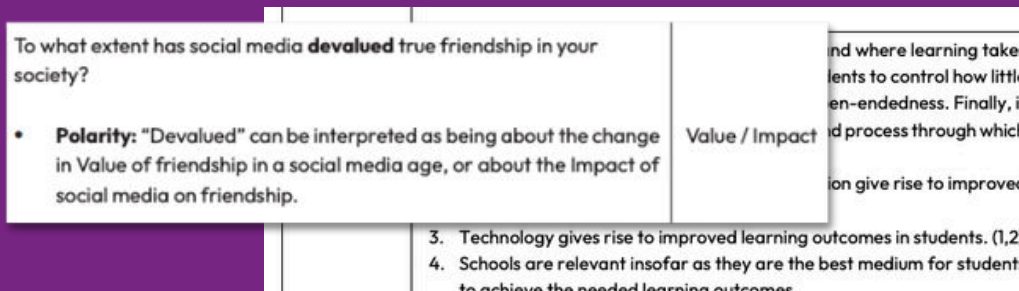
- You are an Indigo JC 2 Term 2 GP students (you've already covered this in class)

Struggle with directly answering essay questions? Find it challenging to identify and address the key issues in General Paper? The answer is that you need to master the polarities in the questions. Do this during this one-day workshop!

- Construct a strong foundation and framework for interpreting Paper 1 questions
- Comprehend all the essay question types, issues, and polarities that are the crux of essay questions
- Create relevant and thoughtful arguments that demonstrate a profound and the conceptual understanding of the issue

What's included

- Comprehensive notes on the structures and systems to grasp and tackle each essay question polarity
- In-class exercises (with full answer keys) for immediate feedback



To what extent has social media **devalued** true friendship in your society?

- **Polarity:** "Devalued" can be interpreted as being about the change in Value of friendship in a social media age, or about the Impact of social media on friendship.

Value / Impact

3. Technology gives rise to improved learning outcomes in students. (1,2
4. Schools are relevant insofar as they are the best medium for student

General Paper

Comprehension Macro-Micro Reading

Suitable for JC 2 students who...

- Read the passage, "understood" it... then looked at the questions and went blank
- Keep losing marks even after practising more
- Hit a wall whenever the passage topic is unfamiliar

This workshop is not for you if...

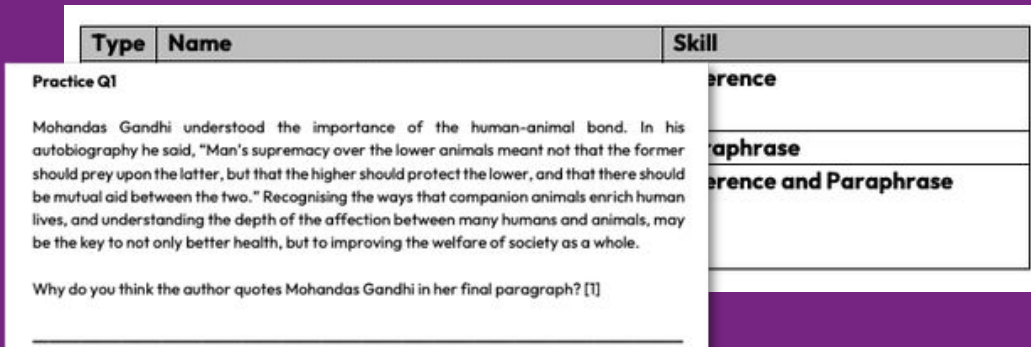
- You are an Indigo Term 2 GP students (you've already covered this in class)

Feel like you just can't "get" comprehension passages? Lacking confidence in your answers even after consistent practice and drilling? Master essential comprehension passage reading skills in this one-day workshop!

- Pick up essential micro and macro reading skills that ensure an accurate understanding of a comprehension text, regardless of prior knowledge on the subject matter and challenging vocabulary
- Take in common writing techniques and tricks deployed by comprehension passage authors and how to approach them

What's included

- Comprehensive notes on the passage reading skills involved in all Paper 2 components.
- In-class exercises (with full answer keys) for immediate feedback.



Type	Name	Skill
		erence
		aphrase
		erence and Paraphrase

Practice Q1

Mohandas Gandhi understood the importance of the human-animal bond. In his autobiography he said, "Man's supremacy over the lower animals meant not that the former should prey upon the latter, but that the higher should protect the lower, and that there should be mutual aid between the two." Recognising the ways that companion animals enrich human lives, and understanding the depth of the affection between many humans and animals, may be the key to not only better health, but to improving the welfare of society as a whole.

Why do you think the author quotes Mohandas Gandhi in her final paragraph? [1]

H2 Mathematics

The 70 % Bootcamp

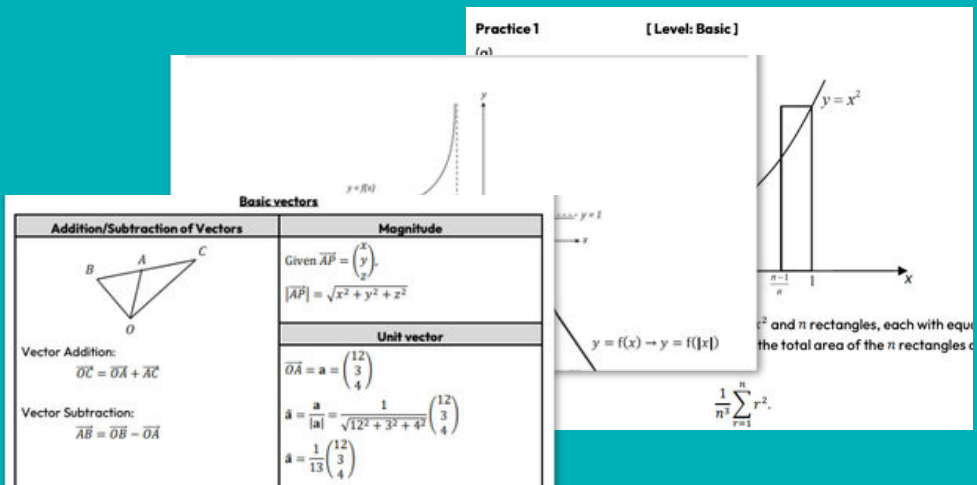
Vectors + Calculus + Graphs and Functions

Suitable for JC 2 students who...

- get vectors, forget it two weeks later, re-learn it, forget again
- Wants a complete exam grade revision on key math topics

Vectors, differentiation, and integration make up about 70% of the A-Level paper. Our boot camp covers all three in 25 hours across 2 weeks. What our tutors consistently see is that students understand these topics during lessons but forget the methods weeks later. This programme is designed to break that cycle through structured drilling. By the end, the methods are automatic, not memorised.

- The real problem isn't understanding, it's retaining. We drill every question type until the methods become automatic.
- After June, there's no more time to focus on one topic properly. It becomes a sprint to the finish with every subject competing for attention. This is the last chance to fix foundations.
- No surprises in the exam. Every question type is covered. When you've seen them all, you finally know exactly what to expect.



INDIGO

MATHEMATICS | JUNIOR COLLEGE 2

Schedule (Choose 1 Run to attend per module)

Vectors

(Current Indigo JC 2 Math students do not need to attend)

Run 1	1 Jun (Mon), 5 Jun (Fri)	10am - 4pm (1 hr break)	Balmoral Plaza, #B1-09

H2 Mathematics

One Day. Two Topics. Zero Guesswork in Exams.

Graphs and Functions

Suitable for JC students who...

- Lose marks on graphing questions they thought they understood
- Struggle with rational functions, conics, or transformations
- Find Functions questions abstract — domains, inverses, composites
- Want intensive exam grade question type , not more theory
- Want to automate thinking process, not go through notes

Graphing and Functions appear across multiple A-Level paper questions — but most students never practise them properly. This programme is 5 hours of pure drilling: 3 hours of graphing in the morning, 2 hours of functions in the afternoon. No theory. Just exam-grade practice until the methods become automatic.

- 3 hours of graphing: rational functions, conics, and graph transformations drilled to exam standard
- 2 hours of functions: domains, inverses, composites — including hybrid questions that combine topics
- Prelim-level questions so students see what examiners actually ask
- Smart shortcuts and full methods to build speed and accuracy
- Practice-focused format — not a lecture, just structured drilling with guided solutions

INDIGO

MATHEMATICS | JUNIOR COLLEGE 2

What's included

- Exam-grade practice sets (not theory worksheets)
- Hybrid and prelim questions
- Progress tracker quizzes

Schedule (Choose 1 Run to attend)

Graphs and Functions

Run 1	2 Jun (Tue)	10am - 4pm (1 hr break)	Parkway Parade Office Tower, #06-03
Run 2	8 Jun (Mon)		United Square Office Tower, #17-01

H2 Mathematics

Conquer Vectors

The One Topic No One Walks into A-Level Exams Ready For*

*Current Indigo JC 2 Math students do not need to attend

Suitable for JC 2 students who...

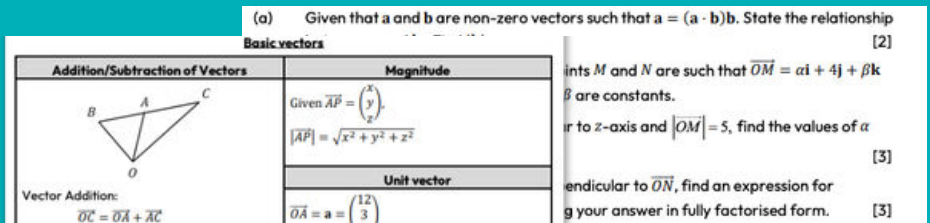
- Find Vectors questions abstract and hard to visualise
- Can follow worked examples but freeze on exam questions
- Struggle to connect dot product, cross product, and planes
- Need to settle this topic before the A-Level exams

This bootcamp is not for you if...

- You are a current Indigo Junior College 2 Math student

Vectors carries one of the heaviest weightings on the A-Level paper, and it's the topic students are least prepared for. Every concept builds on the last — dot product, cross product, lines, planes — and weekly lessons can't keep pace. This boot camp scaffolds the entire topic from basics to exam-grade in 2 intensive days. No gaps. No forgetting. Settle it once and for all.

- Scaffolded from basic concepts to exam-grade questions in one continuous block
- Every layer builds on the last — dot product, cross product, lines, planes — no gaps, no forgetting
- Exam-standard questions that reveal the gap between textbook answers and real A-Level performance
- Methods drilled until they're automatic, not just understood



Basic vectors

Addition/Subtraction of Vectors	Magnitude
Vector Addition: $\overrightarrow{OC} = \overrightarrow{OA} + \overrightarrow{AC}$	Given $\overrightarrow{AP} = \begin{pmatrix} x \\ y \\ z \end{pmatrix}$, $\lvert\overrightarrow{AP}\rvert = \sqrt{x^2+y^2+z^2}$
	Unit vector
	$\overrightarrow{OA} = \mathbf{a} = \begin{pmatrix} 12 \\ 3 \end{pmatrix}$

(a) Given that **a** and **b** are non-zero vectors such that $\mathbf{a} = (\mathbf{a} \cdot \mathbf{b})\mathbf{b}$. State the relationship [2]

ints M and N are such that $\overrightarrow{OM} = \alpha\mathbf{i} + 4\mathbf{j} + \beta\mathbf{k}$
β are constants.
r to z-axis and $\lvert\overrightarrow{OM}\rvert = 5$, find the values of α
[3]
endicular to $\overrightarrow{ON}$, find an expression for
g your answer in fully factorised form. [3]

INDIGO

MATHEMATICS | JUNIOR COLLEGE 2

What's included

- Structured notes from basics to exam-grade
- Fully worked solutions for every question type
- Progress tracker quizzes

New students can combine Vectors with Calculus (10 hours) and Graphing & Functions (5 hours) for complete coverage of approximately 70% of the A-Level paper. Contact us for details.

Schedule (Choose 1 Run to attend)

Vectors* *(Current Indigo JC 2 Math students do not need to attend)

Run 1	1 Jun (Mon), 5 Jun (Fri)	10am - 4pm (1 hr break)	Balmoral Plaza, #B1-09
Run 2	16 Jun (Tue), 23 Jun (Tue)		Parkway Parade Office Tower, #06-03

Fees

	From 1 May 2026	Early Bird Special (30 April 2026)	Indigo Access+ (Immediate*)
Vectors	$730	$657	$548
Graphs and Functions + Vectors	$1,070	$963	$803

- All fees are subject to GST

H2 Mathematics

The Two Highest-Weightage Topics on the A-Level Paper. Two Days to Get Them Right.*

Calculus Module for JC 2 Bootcamp

*Current Indigo JC 2 Math can sign up for Part 2

Suitable for JC 2 students who...

- Can differentiate but struggle with applications and multi-step questions
- Lose marks in optimisation, curve sketching, or area questions
- Find integration questions long and algebra-heavy
- Understand the methods but need exam-standard practice

This bootcamp is not for you if...

- You are a current Indigo Junior College 2 Math student

Differentiation and Integration are tested together in the A-Level exams and carry more marks than any other topic. In the sessions, students will leave knowing exactly where their gaps are and how to close them.

Differentiation

Techniques, rates of change, tangents, stationary points, optimisation

Integration

Techniques, Riemann sum, area under curve, volume of revolution

- Exam-grade questions with fully worked, structured solutions
- Together with Vectors, Calculus makes up the bulk of the A-Level paper

INDIGO

MATHEMATICS | JUNIOR COLLEGE 2

What's included

- Structured notes from techniques to applications
- Fully worked, exam-grade questions with complete solutions
- Timed tests with full go-through each day
- Progress tracker quizzes

New students can combine Calculus with Vectors (10 hours) and Graphing & Functions (5 hours) for complete coverage of approximately 70% of the A-Level paper. Contact us for details.

Schedule (Current Indigo JC 2 Math can sign up for Part 2)

(Choose 1 Run to attend)

Differentiation

Run 1	2 Jun (Tue)	10am - 4pm (1 hr break)	Parkway Parade Office Tower, #06-03

H2 Chemistry

The Perfect Bootcamp to Get You Back on Track!

Suitable for JC students who...

- who scored below B on their last Chemistry test

This bootcamp is not for you if...

- You are a current Indigo Junior College 2 Chemistry student

JC Chemistry is tough — but the June holidays are your best chance to close the gaps before Promos. Customise your revision with the flexibility of selecting topics that you are weak in.

- Focused, exam-relevant revision notes
- Crystal-clear explanations that fix misconceptions at the root
- Fully worked, exam-grade questions with complete solutions
- Smart shortcuts and full methods to build speed and understanding
- Critical foundations for promos and a non-negotiable base for JC 2 topics

What's included

- Question analysis
- Comprehensive notes
- Progress tracker quizzes

New students may opt to join the regular lessons in June holidays for an in-depth understanding to Chemical Equilibrium, which is a foundational topic for future tougher chapters. Contact us for more details.

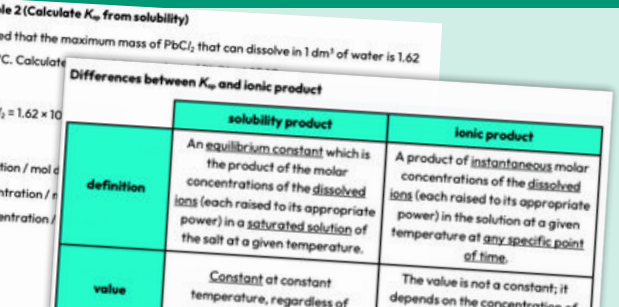
H2 Chemistry

The 5 Lessons that will Save your Chemistry Grades!

Lesson 1	Solubility Equilibrium
Lesson 2	Acid Base Equilibrium
Lesson 3	Electrochemistry (Part 1)
Lesson 4	Electrochemistry (Part 2) + Elucidation (Part 1)
Lesson 5	Elucidation (Part 2)

This transformative bootcamp promises to be a game-changer to help you score an 'A' grade! It's now or never!

- **Master the toughest JC 2 topics once and for all**
  Focused coverage of electrochemistry, acid–base equilibrium, solubility equilibrium and elucidation.
- **Be fully prepared before Mid-Year Exams and common tests**
  Intensive four-hour lessons designed to make exams after June manageable, not stressful.
- **Follow a complete, exam-proven scheme of work**
  Everything taught here will not be repeated later—just revise and refine towards the A-Level exams.
- **Maximise the June holidays for long-term results**
  Turn June into a decisive learning advantage instead of last-minute catch-up.



What's included

- Question analysis
- Comprehensive notes
- Progress tracker quizzes

Schedule (Choose 1 Run to attend)
