Fractions Masterclass

Fractions is where PSLE Math really begins

Your child will walk away understanding exactly how to approach fraction questions — even the ones that look nothing like what they practised in class. No more guessing which method to use.

- Understand fraction concepts that trip up most P4 students
- Learn to identify what the question is actually testing — not just the topic, but the concept
- Build a consistent S.M.A.R.T approach to choosing the right method for every question type

Understanding and mastering P4 Fractions is where P5 and P6 math begins. The heuristics your child learns here apply directly to percentage, ratio, and rate questions in the years ahead. Get it right now, and the foundation holds.

What's included

- Concept-based fraction lessons
- Heuristics training with S.M.A.R.T framework
- Progressive difficulty practice

Concepts & Heuristics Know the Method. Pick the Right One.

Your child will walk away knowing exactly how to read a question, identify the concept being tested, and choose the right approach — even when the question looks unfamiliar or mixes multiple topics.

- Master the three most commonly tested concepts: Equal Concept, Remainder Concept and Set Concepts
- Practise identifying concepts even when the wording changes — progressive difficulty from guided to exam-grade
- Tackle mixed-topic questions where you choose the right heuristic without being told the topic

By the end of the workshop, your child will have a reliable process for approaching any P5 math question. Not more tricks — a proven thinking habit that holds up under exam conditions.

What's included

- Concept identification training
- Heuristics training with S.M.A.R.T framework
- Exam-grade mixed-topic questions
- Non-routine question strategies

PSLE Preparation
Close the Gaps. Sharpen the Edge.

Suitable for Primary 6 students preparing for PSLE

June is the last uninterrupted revision window before PSLE. Two focused workshops — Concepts and Heuristics — tackle the two challenges P6 students face. Take one, or take both.

Concepts — Close the Gaps

- Cover all core concepts across P6 topics to ensure a solid foundation
- Identify and close gaps before PSLE revision intensifies in Term 3
- Build confidence on questions your child currently avoids

Heuristics — Sharpen the Edge

- Tackle the higher-order thinking questions that make up 15% of PSLE
- Practise selecting and applying heuristics under exam-level difficulty
- Bridge the gap between AL3–4 and AL1–2

Your child doesn't need more homework. They need the right thinking process for the questions that matter most. The S.M.A.R.T framework gives them that — a consistent approach to any question PSLE can ask.

What's included

- Concepts workshop: core concept revision across P6 topics
- Heuristics workshop: higher-order thinking question practice
- S.M.A.R.T thinking framework application
